

3d  
*portrait*

#### Software used:

- Nomad Sculpt
- Blender

A 3D character created as part of the thesis *Self-Portraiture & Beautification in 3-Dimensional Avatars*. Intended to be androgynous in order to increase representation in games.

#### Current Progress:

- 2 be implemented in Unity as a playable avatar.

*calico  
critter*

*mutated  
vers.*

A character made for the inside cover of the magazine I currently work for, *The Oregon Voice*, as a "meet-the-staff" image.

# Mano a La Pared - Remix

DJmegan23, PIERI

1:07 -0:55

About the artist

A spinning visualizer  
for LA-based DJ.

3d  
-sculpted  
+  
-printed  
nail

#### Mechanics

- PVC print material
- Arduino

Created & printed a 3D press-on nail prototype which lights up when waving the hand, detected with tilt-ball motor.

cover*

Software used:

- PolyCam

Used 3D-scanner to capture scenes from nature in the Italian Dolomites, combining them into two cohesive sculptures used for storytelling of the local indigenous folk story, *The Moon Princess*.
